

Cable Joint Kit

Cable Joint Kit is suitable for sealing underground cable connections.

The PU resin cures to a hard high quality sealing compound which creates a durable seal around the cable connection.

Features

- Junction box with 3 cable glands
- The PU resin has excellent adhesive strength on metal and synthetic material
- Simple and quick installation
- Horizontal and vertical installation possible
- Optimal electrical protection
- Waterproof
- Simple freight procedure due to the non-hazardous material.

Material Resin	Polyurethane (Non-hazardous)
Temperature Range	-25°C to 120°C
Outer Dimensions	90 x 90 x 52 mm
Inner Dimensions	77 x 77 x 46 mm
Cable Gland Size	M25
Cable Size	9 – 17 mm Dia.
IP Value	IP68

Cable Joint Kit

1. Remove the aluminium outer bag taking care not to damage the clear inner bag. Immediately use the resin after opening the aluminium outer bag.

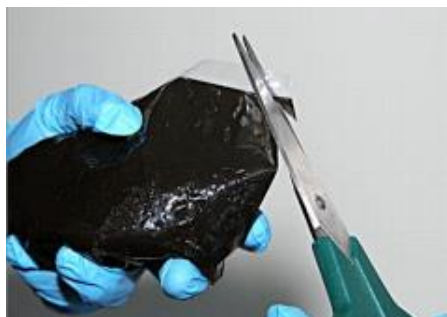

Attention: Do not mix different types or brands of resins. Take steps to prevent damage as a result of spilling resin. Wear disposable gloves and process only in a well ventilated room.

2. Remove the separator from the centre of the bag.

3. Mix contents by kneading vigorously for at least two minutes. Make certain all the resin compound is squeezed from the corners and edges of the bag.

4. Pouring of the resin: Cut a small edge from the bag. Carefully pour the resin into the joint shell. Empty (hardened) resin packs can be disposed as regular waste material.
