

## Potable Ag-AgCl Seawater Reference Electrode

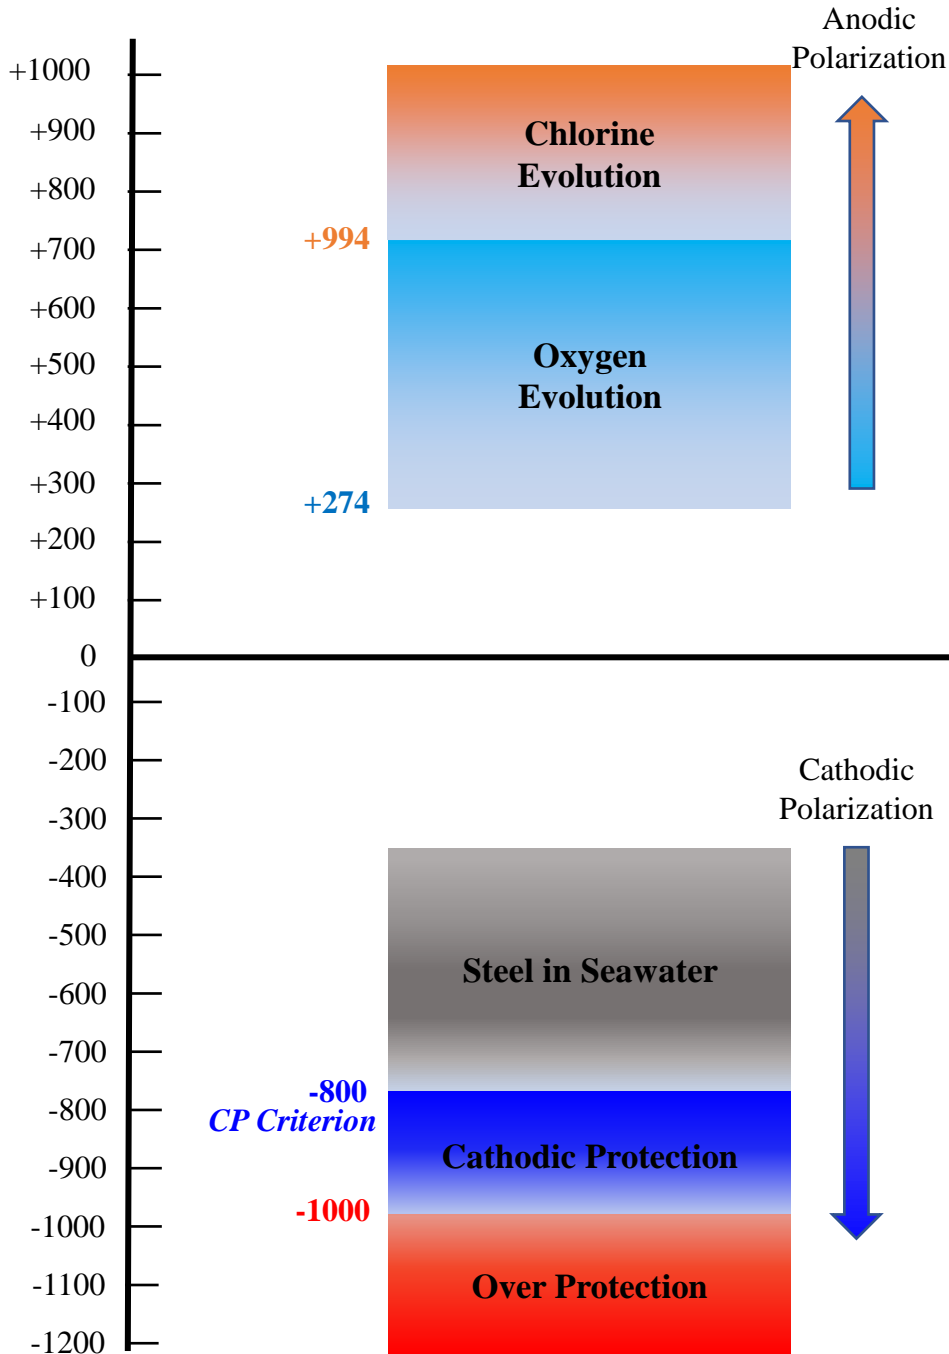

**ProCell Portable Silver-Silver Chloride (Ag-AgCl) Seawater Reference Electrode** is one of the most reliable and durable electrodes used in seawater applications. Long-stable life and performance of ProCell is achieved by the specially designed seawater gel.

### Specifications

Body	CPVC
Design Life	Min. 10 Years
Waterproof Quick Disconnect Cap	Up to 50 m deep
Temperature	0 - 70° C
Backfill Composition	Seawater Gel
Body Sizes	Approx. 20 mm Dia. x 180 mm L including connector
Weight	Approx. 100 grams

# Potable Ag-AgCl Seawater Reference Electrode

Potentials: Cathodic Polarization – Ag-AgCl 3.5 Mol KCl
