

# Power Self-Healing Concrete Crack Repair

## Power Healing L100 & L200

Transparency  
Liquid

Super  
Durability

Simple  
Application

100%  
Inorganic

**Power Healing L100 and L200** are made of 100% inorganic transparent liquid and designed to seal the dry or wet narrow cracks (less than 0.3 mm). It is more cost-effective and durable than epoxy or urethane injections. When two components contact inside the crack, they crystalize in one second, resulting in seal the crack by waterproof gel.

It is so simple to use and does not require any special equipment.

### Repair Condition

Crack width	< 0.3 mm
Crack Condition	Dry, Wet, Water leakage

After Injection

Inside the crack face

# Power Healing L100 & L200

## Package

Product	One Unit	Main Components
L100	20kg/container	Inorganic silicate
L200	20kg/container	Inorganic Salt

## Application Procedure

Clean the crack area (using air) and check the crack width

Apply Powerhealing-L100 and Powerhealing-L200 to the cracks three times in order.

Clean the surface after one day's curing and finish the repair.

- When this product is mixed L100 and L200, the gelation proceeds.
- After long storage, liquid sedimentation may occur, but there is no problem with performance.
- Do not drink because it is an inorganic silicate-based liquid. If accidentally ingested, seek medical advice immediately.
- If it gets on your skin or eyes, wash it immediately with water and consult a doctor if necessary.
