

Power Self-Healing Concrete Crack Repair

PowerRepair-AO for Oily Water Environment

**Repair Material
for Oil Leakage**

High Durability

**Simple
Application**

**100%
Inorganic**

Power Repair-AO is patching mortar including self-healing compounds in the area exposing water & oil environment. To recover any cracks that may occur within the repair patch or at the interface between the existing concrete, PowerRepair-AO is sealed by itself to prevent the oily water leakage.

Application Procedure

Add 3 to 4.5 liters of water with one bag (20 kg) of PowerRepair-AO.

Mixing 3 to 5 minutes using power mixer.

Application time is within 1 hour.

Note:

It can be used with Power Healing L-300, L-400 and L-500 for narrow crack repair.

- Do not add water until it is ready for use.
- Keep in a cool place (< 25°C) when it store for a long time.
- When it is exposed to strong sunlight or high temperature environment, provide wet cover to maintain the moisture for at least 3 days.
- Do not contact with skin or eye. If happens, wash with water. If the condition is sever, obtain medical attention.
